Purpose of the Application

The Library Management System is a web application that helps a library manage its books, authors, categories, readers and loans in one place.

Website: https://thex006.github.io/library-book-manager/

How to Use the System

To use the system:

- Open the website in any browser. Nothing needs to be installed.
- Use the menu at the top to move between pages.
- Every page has a form at the top and a list underneath.
- Your data is saved automatically in the browser.

Main Functions

The system can:

- Manage books (title, author, category, year)
- Manage authors (name, country)
- Manage categories (name)
- Manage readers (name, email, phone)
- Manage loans (book, reader, loan date, return date)

Steps for Using the Application

1. Add an author on the Authors page.
2. Add a category on the Categories page (if needed).
3. Add a book on the Books page and choose its author and category.
4. Add a reader on the Readers page.
5. Record a loan on the Loans page by choosing a book and a reader.
6. When the book is returned, the loan shows Returned after the return date, and the book becomes Available again.

CRUD Operations

Create

- Fill in the form and click Save.

Read

- All saved data is shown in the list under the form.
- The Books page shows if a book is Available or On loan.

Update

- Click Edit next to a row.
- Change the data in the form and click Save.

Delete

- Click Delete next to a row to remove it.

Main Pages

1. Books Page
2. Authors Page
3. Categories Page
4. Readers Page
5. Loans Page
